

Siren Operated Sensor

SOS II

Safety:

- Engineered to allow swift passage to emergency vehicles through gates
- Will open any manufacturer's gate hands-free
- All 9-1-1 responders own the key – their sirens
- Emergency access is swift! The "YELP" response is 2.5 seconds, and for all other sirens the response time is 4.5 seconds

Features:

- Wider operating voltage range. The SOS now operates on 9 to 30 volts, AC or DC
- Higher selectivity. The SOS is now more selective about what sounds constitute a siren.
- Small but noticeable reminder decal on access system for emergency response teams
- Adjustable sensitivity for two to more than twenty feet
- Arming loop detector available
- Switches to: Yelp, Decibel Time, Wail, or Hi-Lo
